IM E-PROCUREMENT

# **Manage E-Procurement** for chains of points of sale with your Dynamics 365 Business Central

IM E-Procurement is specially designed to face the procurement complexity of remote locations, especially for chains of points of sale of Retail, Food or Hospitality

**Microsoft Dynamics 365 Business Central with IM E-Procurement allows coping with the complexity of the purchasing and materials supply to retail shops and warehouses, with a purchasing central and diverse affiliated companies and franchises**

### Easy to manage
Define suppliers, purchasing prices or units of measure for each item and location

### Reliable
Define default location in the Purchasing Central for stock transfers according to each item and the recipient location

### Scalable
The tool can adapt to different customer needs from small chains of points of sale to multi-company environments

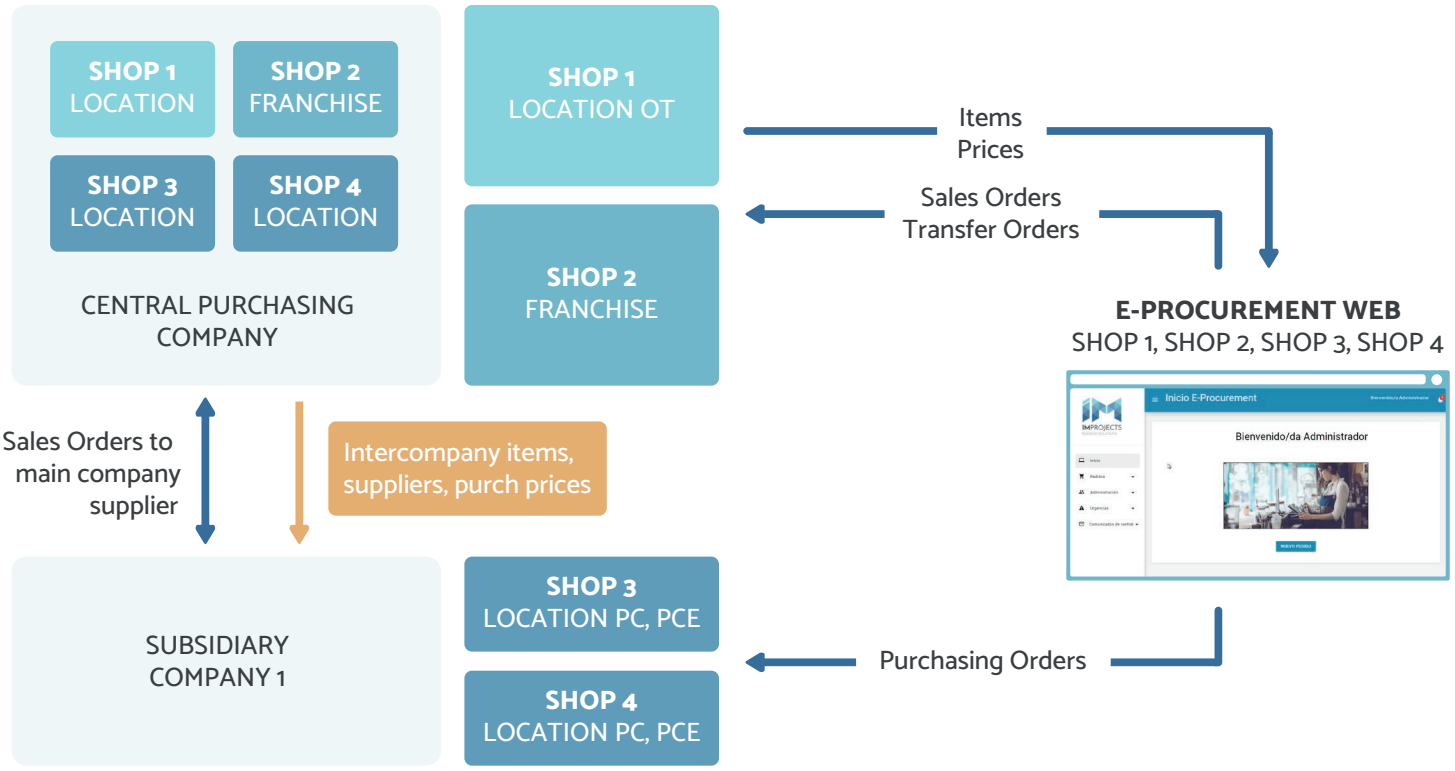
### Web environment
IM E-Procurement web allows the shops to create orders in an user friendly web environment, having all the necessary information

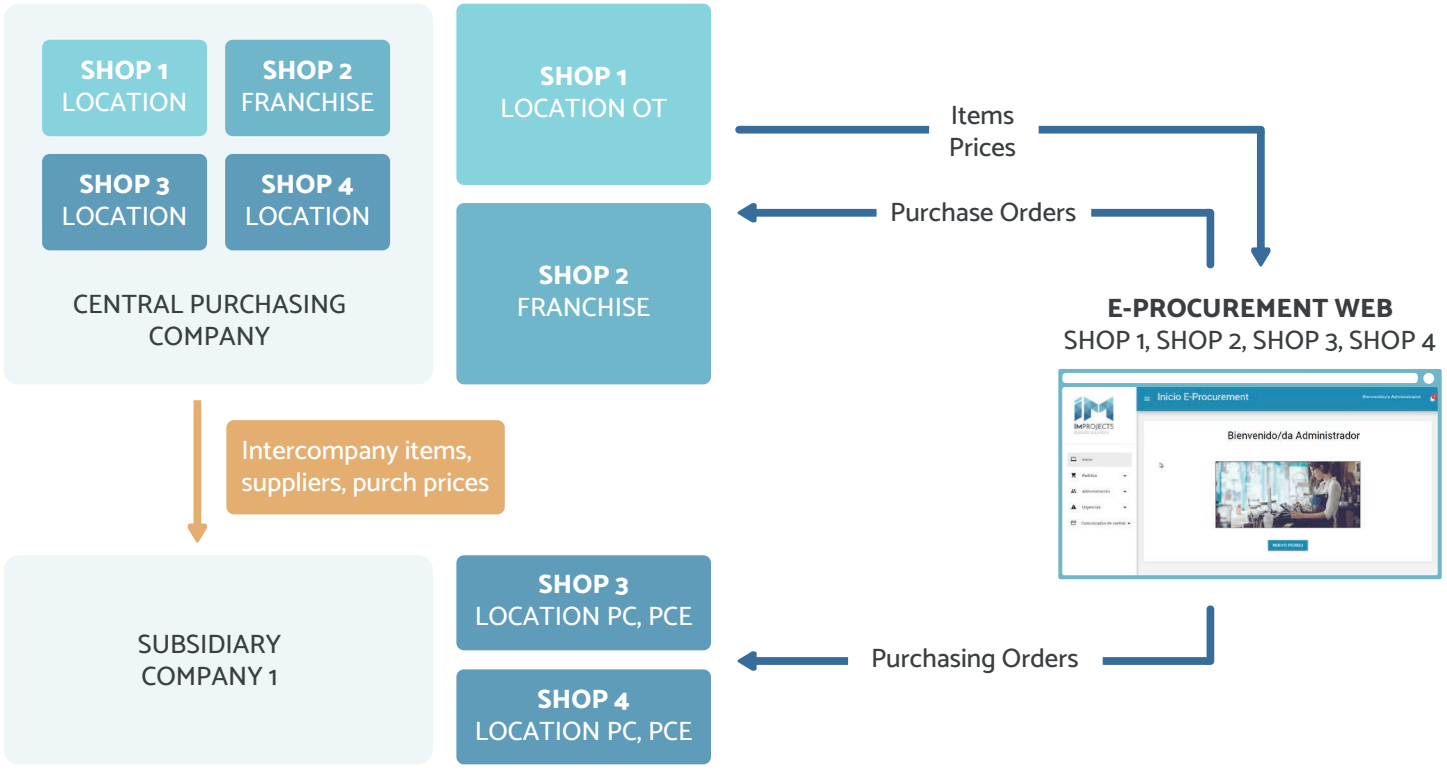
### Franchises
Create different procurement conditions for your franchise shops and allow your franchisees to manage their own purchases through your systems

### Affiliated Companies
Affiliated Companies shops can easily create orders for the Central Purchasing Company according to the specific purchasing prices and conditions

### Own shops
Generate transfer orders for your own shops according to the particular conditions of each location

## ORDERS TO CENTRAL PURCHASING COMPANY





## ORDERS TO EXTERNAL VENDORS
