

IM STOCK OPTIMIZER

IM Stock Optimizer is
a comprehensive tool
to **manage inventory**
in your Dynamics 365
Business Central

This extension provides tools for balancing inventory based on future stock and sales in different locations.

IM Stock Optimizer is especially helpful for Size and Color items

Combined with IM Size&Color extension, it helps manage stocks in Retail Industries such as fashion, jewelry, shoes, or furniture

Easy to use

Balancing stocks in retail industries, especially chains of shops, is easy, thanks to our comprehensive tools

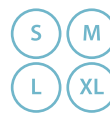

Customizable

IM Stock Optimizer can create different Inventory Balancing Cards to adapt the transactions to your item organization

Reliable

Balancing tool generates the corresponding standard Business Central documents

IM Size&Color

IM Stock Optimizer works with standard Business Central Items; in case of Size and Color, IM Size&Color extension is mandatory

Scalable

IM Stock Optimizer can balance stocks for shops and locations in different Business Central companies
